### Specification

Product Name: Jump starter

Battery Capacity: 18000mAh/66.6WH

Output Voltage: 12V

Dimension: 184\*87\*38 mm

USB1 Output: 5V/2.1A

USB2 Output: 5V/1A

Charger Mode: CC/CV 15V/1A

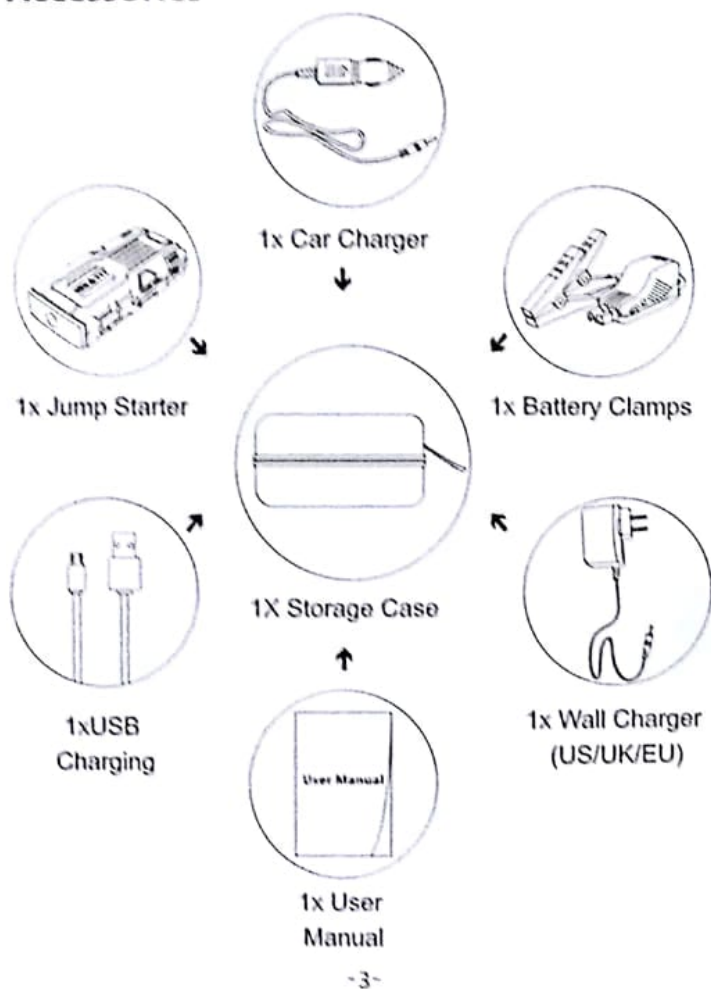

Start Current: 400A

Peak Current: 800A

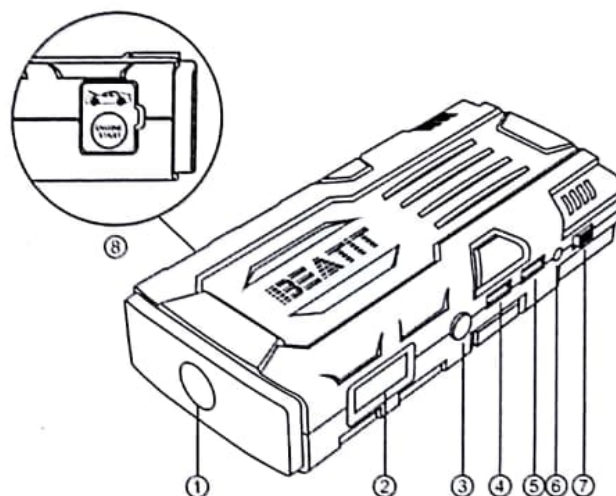

Cycle Life: 3000 times

Operation Temperature Range: -25°C/60°C

## Accessories

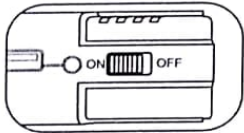

## Structure Diagram

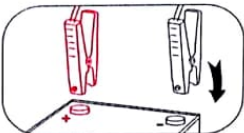

- 1.LED flashlight
- 2.Battery indicator
- 3.Power button
- 4.5V/2.1A USB1 Power Output Interface
- 5.5V/1A USB2 Power Output Interface
- 6.15V DC Power Input Interface
7. Main Power Switch
- 8.12V/800A Jumping Port

## Operation Guide

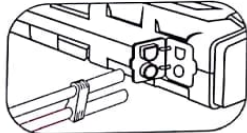

Important: Please turn on the main power switch before use.

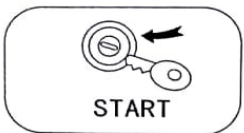

### 1. How to jump start car?

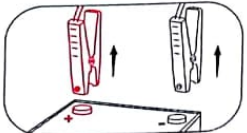

Step 1:  
Connect red clamp to positive(+) terminal and black clamp to negative(-) terminal of the car battery.

Step 2:  
Insert the plug directly into the batterypack as pictured above.

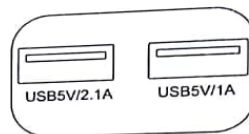

Step 3:  
Use auto key to start the engine of your car.

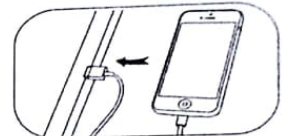

Step 4:  
Remove clamps and pack away.

-5-

### 2. How to charge mobile phone?

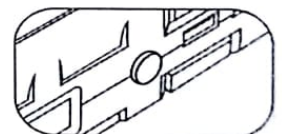

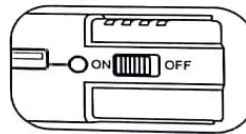

Step one:  
Insert the USB charging cable into the 5V/2.1A USB Power Output Interface

Step two:  
Insert the other end to your mobile phone.

### 3. How to turn on the LED flashlight?

1. Push the main power switch to "ON"
2. Long press this button  for three seconds to turn on Illumination mode (steady on);
3. Then short press the button lightly, LED light will shift to SOS mode (slow flickering);
4. Short press again, it will shift to Warning mode (fast flickering);
5. Short press again, turn off the LED light.

-6-

#### 4. How to charge the jump starter?

There are two charging methods:

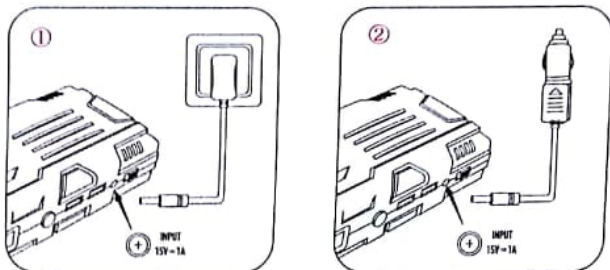

Method 1:

Insert the wall charger cable into the 15/1A Power Input Interface. Insert the other end into the 220V power

Method 2:

Insert the car charger cable into the 15/1A Power Input Interface, insert the other end into cigarette lighter of 12V car.

The battery indicator bar will be flickering, which shows it is being charged. When it is fully charged, the percentage figure will stop flicking.

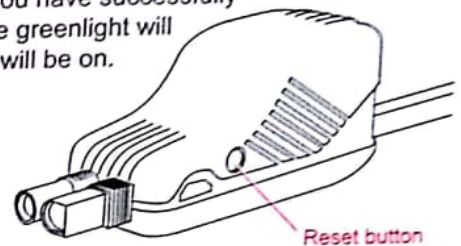

### Smart Clamps Protection

#### 1. How to force "On" the jump start function?

First, please make sure that all your connections are correct; Then, please press the reboot button of the clamp for 3-5 seconds, after this step, the green indicator light will be on

for 15-20 seconds, just go and restart your car during the 15-20 seconds. If you have successfully started your car, the green light will be off and red light will be on.

※When the jump starter power is less than 20%, you need force a reset of the smart folder if you still want to start the car, but we don't recommend this, cause it will reduce the battery life span

※The red indicator will be turned on when the battery is out of power or the voltage is less than 1V.

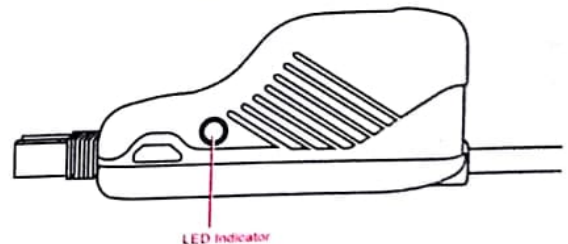

#### 2. Intelligent clamp Indicator light

(1) light turns green: Connect properly

(2) light turns red: ① Connect reversely

② The voltage is less than 1V

③ The jump starter power less than 20%

## Cautions & Warnings:

1. For the first time use, please fully charge this product.
2. Please make sure the battery energy is more than 95% when you use it to jump start a car. When the battery energy is low, it can not start a car or the start-up times of low-emission vehicles will be reduced.
